

IN AN EMERGENCY, SECONDS SPELL THE DIFFERENCE BETWEEN THE SUCCESS AND FAILURE OF YOUR ENTIRE SECURITY PLAN.

THE KEY IS THE QUALITY AND ACCURACY OF ANY ELECTRONIC SECURITY COMPANY'S CENTRAL STATION MONITORING SERVICES.

But how can you judge a company's monitoring services BEFORE becoming a customer? We understand a customer's need to know, and have appropriately responded with a program entitled:

What is 5 Star Monitoring? Vector Security's adherence to a strict set of performance standards brings the outstanding quality of our monitoring services clearly into focus. Compare these performance standards to any other available service, and you'll see, first hand, how Vector Security's services outdistance all others.

5StarMonitoring

VECTOR SECURITY 5 STAR MONITORING

THE STARPOINT

WHAT IT PROVIDES

BENEFIT TO VECTOR CUSTOMERS

1

Total Control

- Vector Security's central station services are owned and operated solely by our company.
- No third party or subcontractor outside our company is employed in providing this life and property saving service

We alone maintain ultimate control over ALL aspects of our central station monitoring services

2

Exceptional Standards Of Quality

- Vector's central station services are listed or approved by the following agencies

Reflect the highest attainable industry standards

3

Speed, Accuracy & Custom Tailored Dispatching

- Regionally based, fully networked monitoring facilities
- Tailored notification lists and operator instructions
- Customized cancellation codes
- Automated customer paging & fax services

Produces one of the industry's fastest, customer friendly, and accurate monitoring and dispatching service

4

Operator Training & Tenure

- Operators are SIA/APCO certified
- Structured ongoing training programs
- Highly experienced management
- An average tenure of over 6 years on the job

A Vector central station operator offers the highest level of knowledge, training and job experience

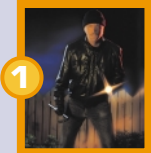

5

The Best Available Technology

- Fully redundant computer hard and software
- Web based activity reporting through VectorVision™
- The most technologically advanced receiving software
- Direct dial automated 911 center communications equipment
- Secured monitoring through Secure Trac™

A uniquely balanced combination of an outstanding performance commitment, the industry's best trained and experienced people, and the highest level of technology, producing one of the most accurate and reliable monitoring networks.

System Function Upon Activation

1

Sounds the system siren/ sounder warning occupants and the intruder as well

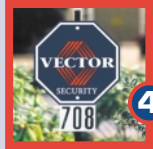

2

Transmits the appropriate emergency signal to Vector's central monitoring station

3

Central station calls the customer to "verify" the emergency then dispatches the authorities AND contacts others on your response list

4

Responding authorities identify your location through the familiar Vector yard sign

Of course the proof is putting our word to the test.

Here's what one Vector Security customer had to say —

Vector Security
Roger Goldman
7420 Fullerton Road
Suite 100
Springfield, VA 22153

Dear Roger,
On November 30th, my new Vector Security system was put to the test. It was 4:30 AM and I was sound asleep in my bedroom when I heard my alarm going off. Within seconds, Vector was calling me to make sure I was okay. She told me to stay where I was and she was going to dispatch the police.

Within seconds, the police were on the phone with me and stayed on the line until the officers arrived. Everyone treated the situation with a sense of urgency and that was important to me. After the police left, Vector called back to make sure I was okay.

Unless you have experienced a home intrusion, you can't understand how terrifying it is. Your life depends upon you, your security system and the police who respond to it. I am so pleased to know that I have such kind, caring and experienced people behind me.

Sincerely,

Kelly Bergemstock
